Over the course of the past 18 years you have learned to expect the best from Capitol Packaging. You depend on our research help in developing and filling your aerosol products. You know we have the ability to manufacture your products according to your quality control specifications. You rely absolutely on the dependability of our delivery schedules.
You have come to count on us.
We realize that your aerosol sales are growing and that your customers are located all across the country. Therefore in 1969 we expanded our service to a new filling facility at Sparks (Reno), Nevada, to put our service closer to your western customers.
Now we have another plant abuilding in Atlanta to broaden our service to you still further. We've worked hard to earn your trust. Now we're making the service you have come to rely on even more convenient for you—Midwest and East, West or South.
Try our service now at Chicago or in Sparks, and in Atlanta soon. It's a pretty sound wager.
